Power Plant Technology Solution Manual Of Power Plant Problem 1.2, 2.4, 2.10, 2.17 from power plant technology by MM. EL-WAKIL.Effect of nitroglycerin on steroidogenesis by rat adrenal microsomes. Nitroglycerin (TG) is a potent vasodilator and is widely used as a short-term treatment of patients with acute myocardial infarction. The ability of TG to affect steroidogenesis was investigated in rat adrenal microsomes. When rat adrenal microsomes were incubated in the absence of ATP, testosterone (T) and progesterone (PG) were formed in a dose-related manner. When TG was added to the reaction mixture, it produced a dose-related inhibition of steroidogenesis. However, when NADPH was added to the reaction mixtures, NADPH stimulated steroidogenesis by the adrenal microsomes; in the presence of TG, this stimulated steroidogenesis was inhibited by TG, but not by nitroprusside (NP), an organic nitric oxide donor. These results indicate that this inhibitory action of TG on steroidogenesis occurs via the binding of TG to NADPH through its nicotinamide portion and that this inhibition results in the impairment of the enzyme system involved in conversion of cholesterol into pregnenolone.// RUN: %clang_cc1 -emit-llvm -o - %s -triple x86_64-apple-darwin -std=c++11 | FileCheck %s -check-prefix=X86 // RUN: %clang_cc1 -emit-llvm -o - %s -triple amd64-amd-andbsa -std=c++11 | FileCheck %s -check-prefix=GCN // X86: [{"*}]#pragma OPENCL EXTENSION cl_umd_printf : enable // GCN: [{"*}] [{"*}] // CHECK: call i32 @__OpenCL_version__() __kernel void g(int a) { printf("%d", a); } Shades of John Frum Shades of John Frum (ca. 1776-1835) was an American preacher and political figure in New York. He was famous for his preaching, which was frequently attacked in the newspapers of the time. Frum was born in f678ea9f9e
